**2nd International
Botulinum Toxin and
Facial Injectables Course
& Hands-on Workshop**

10–11 October 2024

www.orl-muenchen.de

Dear colleagues,

we are pleased and excited to announce the **2nd International Botulinum Toxin and Facial Injectables Course** of our Department, taking place in October 2024.

In this era of rapidly evolving medical science the expansion of medical and cosmetic applications of the face and neck continues to require scientifically credible education and training. Our course once again explores a wide range of topics with emphasis on facial injectables, anatomic considerations, injection techniques and the latest treatment developments.

Together with eminent colleagues and international key opinion leaders from various specialist fields we aim to provide the best medical content and education, expanding your knowledge of cosmetic and functional treatments of the face and neck.

Our hands-on workshop with limited number of participants combines live injection procedures and injections on models for a complete and comprehensive look at injection techniques.

The course will be certified by the Bavarian State Medical Association.

We look forward to welcoming colleagues and friends from all over the world in beautiful Munich!

Prof. Dr. M. Canis
Director of the ORL
University Department

Assoc. Prof. Dr. Ch. Karapantzou
Course Instructor
